DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 5
- I. Claims 1-5 and 8, drawn to the modification of displayed images, classified in class 348, subclass 333.12.
 - II. Claims 6-7, drawn to use for previewing images, classified in class 386, subclass 240.

The inventions are distinct, each from the other because of the following reasons:

- 10
- The claims are drawn to either the modification of displayed images by way of control functionality or to specific image processing means to generate a reducing hierarchical image structure.

- Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required
- 15
- because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

- Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims
- 20
- encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 2622

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of
5 record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is also reminded that upon the cancellation of claims to a non-elected
10 invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
